

COMPANY HUMAN RESOURCES HANDBOOK & OPERATIONS MANUAL

Document Version: 2026.1

Target System: Internal Knowledge Base / AI HR Assistant

1. WELCOME AND COMPANY MISSION

1.1 Company Overview

Welcome to the team. This document outlines the core policies, operational guidelines, and expectations for all personnel.

1.2 Core Values

- **Innovation First:** We prioritize continuous learning, modern tech stacks, and efficient problem-solving.
- **Integrity and Accountability:** Every team member is responsible for the quality of their output and their professional conduct.
- **Collaboration:** We break down silos. Solutions are built faster and better when we work across traditional boundaries.

2. WORKPLACE POLICIES & ATTENDANCE

2.1 Standard Working Hours

- **Core Hours:** The standard workweek consists of 40 hours. Regular daily schedules are typically **8 hours per day**, Monday through Friday.
- **Core Collaborative Window:** All employees are expected to be online and available for core collaborative meetings between 10:00 AM and 3:00 PM local time.

2.2 Attendance, Punctuality, and Time Tracking

- **Logging Hours:** All personnel must accurately log their daily attendance and project hours using the company's designated time-tracking software.
- **Tardiness & Absences:** If an employee is unable to report to work or expects to be late, they must notify their **immediate head or supervisor** at least 30 minutes prior to their scheduled start time.

- **Unexcused Absences:** Failure to notify management of an absence for three consecutive working days will be considered job abandonment.

2.3 On-the-Job Training (OJT) and Internship Rules

- **Hour Requirements:** Interns and OJT students must fulfill their total required training hours (e.g., 600-hour programs) strictly adhering to an **8-hour daily schedule** unless an alternative shift is approved in writing by HR and their academic institution.
- **Supervision:** Trainees and interns must operate under the direct guidance of their assigned Project Leader or immediate supervisor. They are subject to the same operational and data security regulations as full-time staff.

3. PROFESSIONAL CONDUCT & MANAGEMENT HIERARCHY

3.1 Reporting Structure and Workflow Escalation

To maintain operational efficiency, inquiries, grievances, and project approvals must follow the established management hierarchy:

1. **Level 1 (Immediate Review): Immediate Head / Project Leader.** All daily tasks, technical blockers, and initial requests must be brought here first.
2. **Level 2 (Departmental Escalation): Assistant Manager.** If a resolution cannot be reached at Level 1, or if the request requires higher departmental clearance, it escalates to the Assistant Manager.
3. **Level 3 (Final Approval): Manager / Department Head.** Final operational decisions, major policy exceptions, and formal grievances are handled by the Manager.

3.2 Professional Dress Code and Behavior

- **Dress Code:** Employees are expected to maintain a clean, professional, or smart-casual appearance, especially when representing the organization at external facilities, client sites, or high-security operational areas (such as airport authority zones).
- **Professional Integrity:** We maintain a zero-tolerance policy for harassment, discrimination, or disrespectful behavior toward any team member, supervisor, or external partner.

4. DATA SECURITY & TECHNICAL COMPLIANCE

4.1 Data Privacy and Confidentiality

- **Confidential Information:** Employees will have access to proprietary software, source code, system architectures, API keys, and internal database structures. This information must never be shared outside the organization.
- **Non-Disclosure:** All proprietary codebases, application logic, and development assets remain the exclusive intellectual property of the company.

4.2 Information Technology (IT) Guidelines

- **Access Control:** Sharing credentials, passwords, or authentication details is strictly prohibited. Multi-Factor Authentication (MFA) must be enabled on all company accounts.
- **Use of AI Tools:** When utilizing external AI or LLM tools for coding or data analysis, employees must ensure that no sensitive company data, proprietary source code, or personal identifiable information (PII) is pasted into public prompts.

5. LEAVE BENEFITS & TIME OFF

5.1 Vacation and Sick Leave

- **Accrual:** Full-time employees accrue paid vacation and sick leave monthly, totaling 15 days of vacation leave and 15 days of sick leave per calendar year.
- **Filing Leave Requests:** Non-emergency leave must be requested and approved by the employee's **immediate head** at least 5 business days in advance. Emergency sick leave must be supported by a medical certificate if it exceeds two consecutive working days.

6. DISCIPLINARY ACTIONS & GRIEVANCE PROCEDURES

6.1 Corrective Action Process

Violations of company policy, unexcused absences, or breaches of data protocol will result in a progressive disciplinary process:

1. **First Offense:** Verbal Warning (documented in writing).
2. **Second Offense:** Written Warning from the Assistant Manager.
3. **Third Offense:** Suspension and formal review by the Department Manager and HR.
4. **Fourth Offense:** Termination of employment/contract.

6.2 Grievance Filing

Employees have the right to voice concerns regarding their working environment. Grievances should be submitted in writing to the **Assistant Manager** or **HR Department**, who will initiate an objective investigation within 48 hours.
