Projects.

AI Powered Online Reservation System with Real Time Availability and Payment Integration using MERN-STACK

An AI-powered online reservation system offering real-time availability updates and secure payment integration. Designed to streamline bookings, enhance user experience, and automate reservation management for modern businesses.

PCC FINDER Mobile App Developed using Flutter and Firebase

mobile branch locator application designed to help users easily find and navigate to Primary Care Clinics (PCC) branches. The app provides accurate and up-to-date information about PCC clinic locations, making it convenient for users to locate the nearest clinic and plan their visits efficiently.

FUTURA An Internal Web-based Program Created Using Mysql, [React.JS](#), [Express.JS](#) and Node.JS

is an internal web-based portal designed to standardize competency leveling and individual development planning as a prerequisite to the Equimetrics performance appraisal process. It ensures structured skill development, automated approvals, and validated competency data that seamlessly integrates into appraisal scoring. By enforcing completion of competency and IDP workflows before appraisals, FUTURA promotes alignment between employee development and organizational performance goals.

BaHanda: A Game-Based Android App with Augmented Reality for Flood Preparedness and Evacuation Planning
